

As the leaves turn and the pace of the season shifts, fall offers a timely reminder that meaningful growth begins with reflection, intentionality, and a willingness to embrace change. This is an ideal time to step back, assess progress, and prepare for the opportunities and challenges that lie ahead. We understand that success is rarely the result of a single decision. It is built through thoughtful planning, strong leadership, operational excellence, and the ability to adapt in an ever-changing environment, be it politically or socially. As organizations approach the final months of the year, now is the time to revisit strategic priorities, evaluate performance, and ensure that teams and resources are aligned with long-term objectives.

Fall also brings an opportunity to refocus on what matters most to you as an organization. Are current strategies delivering the intended results? Are processes supporting efficiency and innovation? Are leaders equipped to guide their teams through change and uncertainty? Asking these questions today can guide organizations make informed decisions, address emerging risks and challenges, and enter the new year with greater clarity and confidence. By combining reflection with forward-thinking action, you can turn experience into momentum for your organization.

Here's to a season of renewed focus, purposeful leadership, and continual improvement. May the months ahead bring fresh perspectives, stronger leadership roles, and lasting success for your organization.

QMII Misses You!

Sue Pathania
Aug 26, 1959 - Oct 26, 2014

Sue in her role as Director HR, championed various initiatives to improve benefits for those working at QMII. Her people passion helped strengthen the foundation for a stronger QMII and broaden the scope of services offered to clients including the introduction of virtual training.

John Broomfield
Aug 11, 1949 - Sep 17, 2026

John founded QMII in 1986 in UK with a mission to help organizations improve using a process based systems approach. His mission still drives all we do at QMII. John retired in 2013 to focus on his growing family. He remained active in advising those seeking help on quality forums.

ISO 45003 in Military Operations: A Framework for Psychological Health and Operational Readiness at Sea

By Dr. IJ Arora

Bridging ISO Management Standards and Naval Operational Readiness

Integrating ISO 45003:2021 into military operations, particularly naval operations, specifically in the context of high tempo carrier strike group deployments like the USS Abraham Lincoln and other deployments of armed forces provides a compelling framework for evaluating psychological health, operational fatigue, and organizational resilience. For subject matter experts in management system standards, those planning the operations, and those in command, the standard gives a useful framework.

RCMS vs ISO 14001: Understanding the Responsible Care Management System for Chemical Companies

By Julius DeSilva

Chemical companies may think that by implementing ISO 14001 they meet the requirements for Responsible Care ®. ISO 14001 is an internationally accepted standard that provides the framework for an environmental management system. However, the Responsible Care ® program demands more. It adds a layer of requirements for Health & Safety and Security to be integrated along with environmental requirements.

The Asset Management System auditing training, led by Dr. IJ, provided a valuable opportunity to exchange knowledge, explore management approaches, and review asset management practices alongside the professional audit team at ProTrans BC.

Working within a forward-thinking organization like AtkinsRéalis, with a clear vision, ambitious goals, and a strong commitment from senior leadership to continuous improvement, fosters collaboration, strengthens team motivation, and supports the journey toward operational excellence.

Implementing an effective Asset Management System goes beyond meeting management requirements. It represents a strategic opportunity to optimize asset performance throughout its life cycle, enhance reliability, improve operational efficiency, optimize life cycle costs, and create sustainable long-term value.

Strong leadership commitment, employee engagement, and a culture of continuous improvement are key drivers of success in achieving these objectives.
