TRAINING FOR VESSEL AND PORT FACILITY PERSONNEL WITH SPECIFIC (DESIGNATED) SECURITY DUTIES ONE-DAY COURSE

In this course you will learn using practical examples of real life situations. You will learn valuable skills to apply on board and ashore to improve maritime security.

Each class covers:

- Relationship between international requirements and domestic regulations
- Security vulnerabilities and techniques used to circumvent security measures
- The meaning and the consequential requirements of the different Maritime Security Levels.
- Knowledge of current security threats and patterns
- Recognition and detection of dangerous substances and devices
- Security Policy and duties of personnel with specific security duties.
- Procedures for conducting inspections and monitoring of restricted areas
- The vessel as a potentially vulnerable entity (for example, an LPG tanker)
- Special measures to enhance security and understanding security levels
- Access control systems
- Security documentation and communication
- Methods for recognition, on a non-discriminatory basis, of behavioral characteristics of persons and patterns likely to threaten security
- Crowd management and control techniques (if applicable)
- Security documentation including the DoS
- Knowledge of emergency procedures and contingency plans

The workshops include:

- Threat Identification, Recognition and Response (audio/visual)
- Understanding of search methods
- Recognizing security equipment and its operational limits including the need for testing, calibration and maintenance (audio/visual)
- Familiarity with detection of weapons, dangerous goods and devices and appropriate action
- Familiarity with different Assault tactics

This course meets the requirements of:

- USCG Regulations (33 CFR parts 104.220 & 105.210)
- ISPS Code Part A Clauses 13.3 to 13.5 and 18.2 to 18.4
- ISPS Code Part B Clauses 13.3 and 18.2
- MSC.1/Circ. 1341, May 2010 and STCW Code Section A-VI/6
