

## Virtual Classes with QMII

With the QMII interactive class room experience, you can benefit from high quality QMII training without having to travel.

In virtual courses you will use the GoToTraining interactive learning platform. The Virtual QMII Classroom (VQC) can be accessed from your Desktop, Laptop or Tablet with an internet connection. There is no requirement to download or install software, you will just need to accept the Citrix plugin for the course.

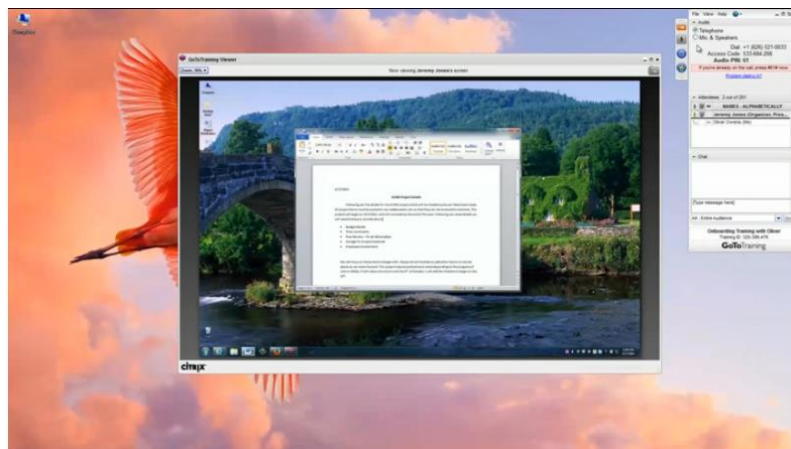

You will:

1. Receive a link that you can click on to access the classroom
2. Input your name so that the instructor can identify you.
3. Have speakers or headphones so that you can listen to the instructor.

Note: It is not a requirement to have a microphone, however, these are recommended for better interaction within the classroom. Students can also dial-in using a telephone to a dedicated conference call number.

Your online classroom includes:

- Interactive Video – You can see the instructor and if you have a camera (optional but recommended), the instructor can see you, too!
- Whiteboards that the instructor can use to draw and write on. (Just as in a classroom)
- A presentation board to present class material / videos / screen share.
- A chat room – You can share your comments with all participants or direct them individually to the instructor.
- The ‘Raise Hand’ option to draw the instructor’s attention just as in a classroom.
- Participants can also use the whiteboard if needed with permission from the instructor.
- Break-out rooms can be assigned to a group of participants to work on workshops just as in a classroom setting.
