

National Maritime Day

National Maritime Day is celebrated every year on May 22nd. This day is specifically focused on maritime safety, cyber security, Maritime Labour Convention and all the elements that make up the lives of those at sea.

QMII offers a unique training and consulting approach to meet the changing needs of the maritime industry.

For more information on the maritime services we provide, [click here](#).

Welcome to the May-June edition of The Globe! This issue is full of highlights of recent QMII activities and developments as well as a featured article on "Can Training Solve The Human Error at Sea?"

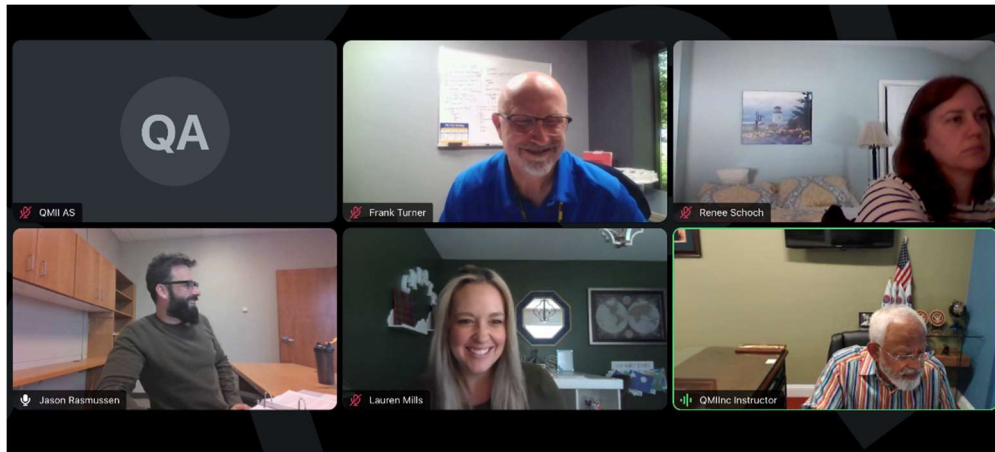

We are excited to see things getting back to normal after the pandemic. This now allows us to better meet your objectives by conducting trainings in an in-person format, making it more interactive with your instructor.

As an ISO 9001 :2015 certified organization, our goal is to enable students to successfully apply process-based management systems and appreciating risks in their organizations, this will bring improvements in productivity and efficiency in their organization.

We, QMII, want you to 'Appreciate Your Management System' and love your non-conformities!

Please see below a list of scheduled courses. For more information [click here](#).

We would like to thank you for subscribing to our newsletter ! Did you miss last month's issue? To catch up on previous issues, visit our website [here](#).

Students engage in a discussion during their [PROBITAS Authentication Certified AS9100 Rev D Lead Auditor training](#).

Can Training Solve The Issue of Human Error At Sea?

Those who have been employed in the maritime industry for even few months will have heard the term that 80% of the accidents incidents at sea can be attribute to human error. The solution for this is often quality maritime training for the personnel involved. However, training is perhaps the most easily reversible corrective action. System experts will even go so far as to say that when something goes wrong do not blame the individual but blame the system. Can it always only be the system fault. Surely human error does play some part.

With the onset of STCW, new rules were ushered in to ensure quality maritime training for all personnel at sea. Similar rules have been extended to those in the inland water towboat industry with the onset of Subchapter M. STCW required maritime training centers to have quality standards systems in place and for flags to provide oversight of the training institutions to ensure quality maritime training was indeed being delivered. So, with such well trained personnel why then do errors still take place?

QMII recently conducted [PROBITAS Authentication certified AS 9110 Rev C Lead Auditor](#) and [Exemplar Global certified ISO 9001:2015 Internal & Lead Auditor](#) in a hybrid format.

[Exemplar Global Certified training, ISO 45001:2018 Lead Auditor training](#) taught by QMII's President and CEO, Dr. IJ Arora in an instructor-led format for the Naval Safety Command personnel in Norfolk, Virginia.

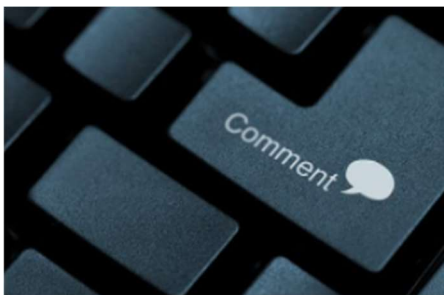

"By far the best training class I've ever participated in. My instructor was so personable and made the class entertaining, continuing to keep us all engaged so that we learn so much in a short period of time."

-Renee Schoch

I feel that given the large amount of information given in the class, that my instructor did a fantastic job keeping the class on the move. I feel as though I struggled to keep up the last day, but that is my personal defect—my instructor did a fantastic job of content delivery and I am very excited about taking my next course in 2 weeks. Honestly, I learned so much and enjoyed my course so much that I am considering taking some courses I don't truly need.

-Aaron Williams
