

## **Quality Management International, Inc. Awarded New Performance Management and Continuous Process Improvement (PM/CPI) BPA**

QMII, an Ashburn, VA Company wins significant contract vehicle to provide Federal Government with key consulting services.

**December 2, 2013, Ashburn, VA** – [Quality Management International, Inc., \(QMII\)](#) along with partner ABSG Consulting Inc. (“ABS Consulting”), was awarded the US General Services Administration (GSA) Performance Management and Continuous Process Improvement (PM/CPI) Blanket Purchase Agreement (BPA). Given the current uncertain budgetary climate, this government-wide vehicle allows agencies to procure a comprehensive set of services to maximize operational effectiveness

The services available include Strategic Planning and Performance Management; Strategic Business Analysis; Process and Performance Improvement; Communications and Change Management; and Training, Certification and Recognition.

The BPA comes at a time when all government agencies are under extreme pressure to improve their operating efficiencies with minimal impact on mission performance. This strategic sourcing initiative from GSA will enable agencies to develop requirements, processes, procedures and tools that can be leveraged and streamlined throughout the Federal Government. It will establish mechanisms to increase savings, value and socio-economic participation, as well as identify gaps in agency strategies, goals and initiatives that will allow time for corrective action. “QMII, a highly recognized management systems consulting company known for its established process-based management systems (PBMS) methodology, has been meeting client objectives for over 27 years now” said Captain Inderjit Arora (IJ), President and CEO of Quality Management International, Inc. “Our wide spectrum of work with the federal government and USCG in particular has resulted in recorded improvements using our approach..”

Quality Management International, Inc. forms part of a highly qualified team of companies that includes ABS Consulting, AMDEX Corporation, Center for Strategic Management, Inc., Harkcon, Inc., and Java Productions, Inc.

### **About Quality Management International, Inc.**

Established in 1986, QMII is one of the original management systems consulting firms previously operating mainly in North America and Europe. QMII clients all over the world now meet their system objectives using the methodology and expertise of the QMII team.
