

UNDERSTANDING AND APPLYING RISK-BASED THINKING

ISO 9001 and standards built upon its foundation, incorporate risk-based thinking to drive a proactive culture of prevention within the organization. Risk-based standards such as ISO 14001 also encourage this concept of risk-based thinking throughout the standard.

This 1-day risk management training is designed to assist candidates understand and apply risk-based thinking throughout their management system to meet the requirements and intent of the standards.

The updated High Level Structure (HLS) in ISO 9001 and many of the other ISO standards reflects a shift in how organizations understand and manage risk. Translate the requirements of risk-based thinking and risk management to your management system. This course provides candidates with the framework for addressing risks within the context of the management system.
