## ISO/IEC 27001:2022 – what are the changes?

ISO/IEC 27001:2022, the international standard for information security management systems (ISMS), was updated in October of 2022 to reflect the latest developments in the field of cybersecurity. These changes are aimed at helping organizations better manage their information security risks and protect their sensitive data.

The majority of changes to the standard were in the Annex A controls which went through a re-structuring to include a change to how the controls were organized and the controls in total were reduced from 114 to 93. Of the old 114 controls .....

**"Sometimes you get a great instructor and not-so-great course materials and sometimes you get great course materials and a not-so-great instructor. QMII did a great job of providing both!"**

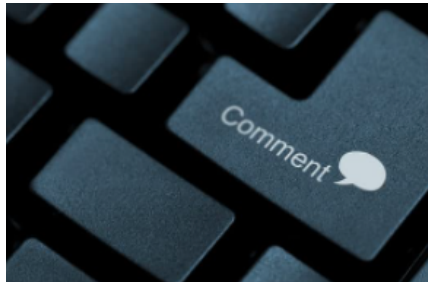

**- Brian Wells**

**"The team at QMII was exceptional in providing me with the necessary tools to be effective at my job. What sets them apart is their professionalism pre and post training, in ensuring they met my needs. Most importantly, the technical expertise and real world experience of their trainers is unmatched and greatly assisted with my understanding of basic, intermediate and advanced levels of audits/assessments. Thank you QMII for the incredible foundation you've provided."**

**- Eric Barreras**

**"I completed my ISO 9001:2015 Lead Auditor course with QMII. Julius and IJ were both exceptional and knowledgeable. Julius helped me to understand a lot on auditing process which I had zero knowledge on. The class was amazing, providing us with a lot of required information. I would recommend QMII to everyone who is in the process on getting Auditor certification"**
