

In this Issue of "The Globe"

As we begin the spring season, we look forward to meeting the objectives of our existing clients, reengaging with our alumni and growing our reach to those seeking to implement sustainable solutions for their management system. We invite you, our readers, to share your success stories, either following a QMII course or from a consulting/auditing engagement with QMII.

In this issue of the Globe, we share an article related to the current Boeing failures, Invite you to access content from a webinar on 'sustaining continual improvement' and share the past two months in pictures, which our readers have come to enjoy. Should you wish to see insights to a current challenge you are facing please reach out to our editor at asingh@qmii.com.

Have a Management System and wondering how to sustain those initial efficiencies?

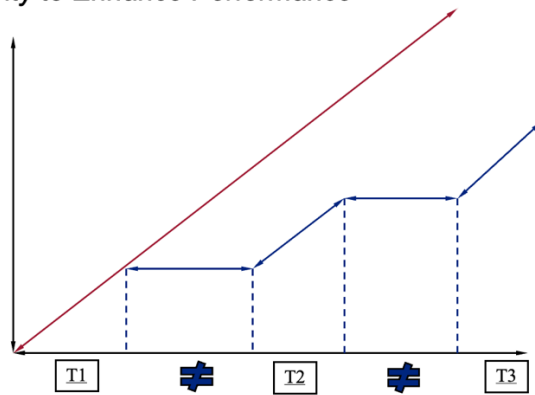

QMII recently conducted a webinar that talked about the How to Sustain Continual Improvement and the culture of conformity. Click this link to access the presentation on QMII's website.

WEBINAR

What is Continual Improvement?

"Recurring Activity to Enhance Performance"

Can Boeing Deliver a Long-Term Solution to their 737 MAX Problems?

- Dr. IJ Arora

Boeing is within the highlight once more with its 737 MAX planes, that have already had a deeply bothered historical past. Buyer center of attention (which is clause 5.1.2 of ISO 9001 and AS9100) turns out to were misplaced someplace.

I've learn a number of contemporary articles on those incidents in addition to Peter Robison's ebook *Flying Blind: The 737 MAX Tragedy and the Fall of Boeing*, all of which level to a worsening scenario for Boeing. The general public belief of this nice American corporate, which has all the time been dedicated to top-class engineering and depended on merchandise, is converting from one among admire to one among warning. Vacationers are questioning, "Must I fly in a 737 MAX?"

Boeing and the aerospace {industry} normally have excessive requirements for high quality and product protection. On this article, I postulate whether or not an organization's high quality control machine can ensure that not anything is going fallacious for patrons. Can it make certain perfection? If no longer, what are the choices—and why have one in any respect?

Audits Adding Value

QMII holds itself to the same standards that our alumni and clients have to. As a part of its ISO 9001 certified QMS, QMII had its first Internal Audit of the year. Audits are a great opportunity to evidence how effective your system is and to capture opportunities for improvement. Looking to outsource your internal audits or get an external perspective. Contact our solutions team to see how we can support you in adding value to your system.

Above Dr. IJ Arora (President & CEO) with his team - Julius DeSilva (Senior Vice President), Anjalika Singh (Vice - President), Lisa Parsley (Global Solutions Manager) and Virginia Ellen (Business System Administrator) with Auditor - Keith Ford.

Welcome to QMII

James Walker - Associate Consultant & Instructor

Captain James Walker is a retired shipmaster with 20 years at sea in command of a variety of vessels, primarily oil tankers. He is a certified ISO 9001 Lead Auditor, lectures on maritime security issues, and conducts various audits and inspections as a marine surveyor. In his spare time, he enjoys yacht racing, and notably, he was a crew-member aboard the 12-meter yacht Freedom in the successful 1980 America's Cup defense campaign with skipper Dennis Connor. He is also an avid squash player in the Rhode Island squash community and is a board member of RhodySquash.

QMII Consulting Support

Chemical manufacturing business has its challenges, particularly as related to health, safety, security and environment. Lot of these companies not only use ISO 9001, ISO 14001 (RC- Responsible Care, approved by the ACC (American Chemistry Council)) and if they have a laboratory then perhaps ISO 17025 and so on. QMII, we are proud to say specializes in the process based management system approach (PBMS) for all these and many other standards. QMII worked with Indorama Ventures in Lake Charles, Louisiana.
